BLIND Copy to C.B. (our silent partner), CC to our key partners in USA .

Our hydro generation Key Spokesperson Brokerage partners are in direct business discussions with the TOP Hydro Generation expert consulting company located in Manila Philippines. We are actively contacting other top Vendor suppliers of Turbines and Energy Generation systems in other nations.

We just found GILKES and are cross promoting your product line as showcased below

SolutionSafeWater.org. that is mega Billion new profitable business strategy for PIPES, TURBINES, PUMPS, Electrical Distribution Systems affecting total conversion from Fossil Fuels to HYDRO GENERATION and soon, World wide revival of NUCLEAR Power Plants (Fission, Fusion), and generation of HYDROGEN fuel by electrical splitting of WATER H2O.

Currently Philippines consumers pay **11peso to 30 Pesos per KiloWatt used**. Our Consultant partner (not revealed at this time) is currently targeting sell price of **3 pesos per kilowatt** generated that is a new world standard for affordable and clean green energy..... Currency exchange rate is currently 1 USD to 52Pesos.

Philippines often experience 1 day per week BLACK-OUTS because of the horrible mus-political mis-management of their energy generation distribution system that is manipulated by foreign investors and family political dynasties.

PRIME REQUEST: Please contact our teams to discuss distributorship of your turbines to Philippines and Asian nations. We are interested also in local manufacturing of your patented designs as well as royalty payments to reduce costs and delays in shipping. We highly recommend you establish as sales and manufacturing industrial site in the Manila area. We can provide your executive management with the top Phillipine and government connections to ensure everyone makes huge profits.

Our broadcast solution is to create 100,000's of small lakes to store the massive rainfall (up to 4 meters per year) of potential energy. This reduces the horrific typhoon flooding to near zero. Then release year round to river stream multi level pipes generating power through micro and mid level turbines all the way from top 1500 meter mountain ranges to the oceans. Philippines has 7107 islands that is huge financial issue of building fossil fuel power plants and transmission power grid lines. HUGE costs that can be massively reduced by local cooperatively produced electricity and clean water distribution systems.

My team are top keynote experts on HydroGeneration Projects in Philippines and other nations.

SolutionSafeWater.org features the HOW TO engineering to bring world electricity production by HydroGen up to 50, hopefully 80% in next 5 years. BECAUSE of the fossil fuel cost energy wars and instability of nations because of economic collapse we have also Prevented. Please contact Keith Duncan ASAP as we are actively cross promoting Your company on our websites and teaching forums. We work DIRECTLY with top level Philippines DOE, Dept of Agri, Dept of Science and Technology, and CONGRESS< SENATORS, top officials and soon world leaders. Keith Duncan
